Outcome:-

The following outcomes were recorded after the webinar

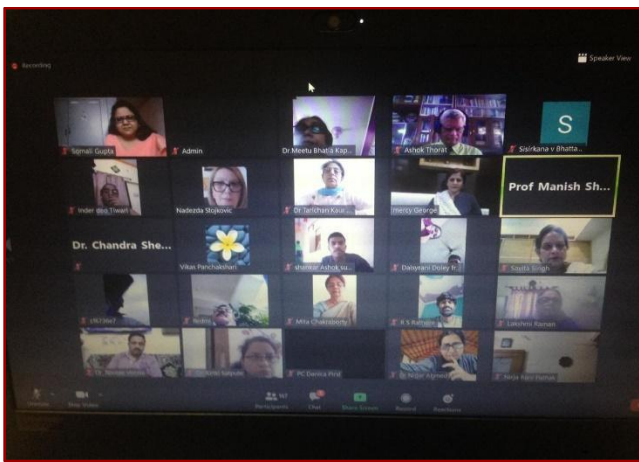

1. New online teaching methods were discussed.
2. Blended learning was seen as the best probable solution for the issues of the students who need the physical movement and better understanding of the subject that is involved in face to face classrooms.
3. New research must be done to address the diversity in the student population while online teaching.
4. There is no way that we can revert to face to face class completely even afterwards so the teachers also must learn and adapt the new methods of online teaching.
