## Report on Analysis of Students' Feedback

### On Curricular Aspects

With quality sustenance as its focus, the IQAC of the institution has developed the feedback mechanism beginning with obtaining feedback from the various stakeholders through a structured rating-based feedback form for continuous improvement in curriculum. The College aims to offer the best possible learning environment to the students in order to empower them to accomplish to their full potential. Feedback allows the opportunity to the students to understand various aspects of curriculum and place their responses on the basis of level of satisfaction. With these valuable suggestions, IQAC submit a report for further improvement of the curriculum, which can be forwarded to the various faculty members to consider in the meeting of Board of Studies.

#### Methodology:

The feedback from students on design and development of curriculum was obtained through Structured Questionnaire which included 08 questions on various aspects of curriculum and suggestion for further improvement.

A five-point Likert scale has been used with weights assigned from 1 to 5 to different levels as follows:

**1- Strongly Disagree; 2- Disagree; 3- Neither Agree nor Disagree; 4- Agree; 5- Strongly Agree**

The Range of each order or level is determined by the following formula:

$$\text{(Highest point in Likert Scale- Lowest point in Likert Scale)/ Number of Levels Used}$$

$$\text{Therefore, Range= (5-1)/5=4/5=0.8}$$

Hence, Range for:

1	Strongly Disagree	1.0 to 1.8
2	Disagree	1.8 to 2.6
3	Neither Agree nor Disagree	2.6 to 3.4
4	Agree	3.4 to 4.2
5	Strongly Agree	4.2 to 5.0

#### Student's Feedback Questionnaire on Curricular Aspects:

S.No.	Particulars
1	Relevance of Curriculum: The content is adequate and career oriented/ employable.
2	Coverage of Course: The course includes fundamental and applied aspect.
3	Value addition: The curriculum incorporates environmental, moral and social values.
4	Skill development: The curriculum is supported with practical/Field work/Project work/other activities.
5	Delivery of content: The course is covered effectively and efficiently through live lectures/ Notes/ Video lectures etc.
6	Availability of resources: The resources for learning are adequate and easily available.
7	Availability of programme: There is ample choice of subject combination or availability of electives.
8	Overall academic atmosphere: The overall academic atmosphere is good.
9	Suggestion for further improvement

To determine that the sample is representative sample or not, sample size adequacy test was performed.

### Sample Size Adequacy Test:

To test the adequacy of sample size, Slovin’s test (1960) has been used, which is as follows:

$$n = \frac{N}{1 + Ne^2}$$

Where n= Minimum Sample Size; N=Total Population; e=Error Tolerance Level

In session 2019-20, total number of students were = 5746. Taking the confidence level as 95 % & Error Tolerance= 5%; so,  $n = \frac{5746}{1 + 5746(0.05)^2}$ ;  $n = \frac{5746}{15.365} \Rightarrow n = 373.966$

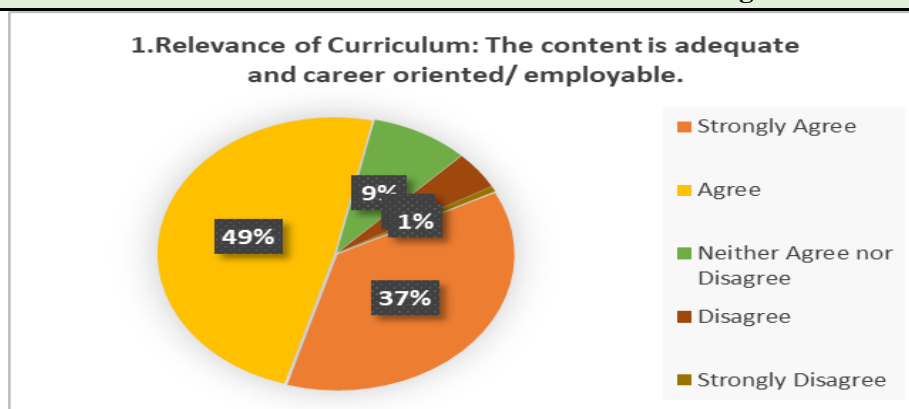

Therefore, minimum 374 students’ feedback forms were required. Since we have received 917 students’ feedback forms from different faculties of students, so it satisfies sample size adequacy test and it is a representative sample.

### Data Analysis and Interpretation:

The response of each question is tabulated as number of students’ responses on five-point Likert scale, percentage of students’ responses, weighted score and weighted mean score.
